

## Lamborghini Huracan Super Trofeo test on Spa-Francorchamps

On the 20.10.2015 Thomas Krebs drove his first test kilometers in a Lamborghini Huracan Super Trofeo racecar, which took place at Spa-Francorchamps in Belgium. The test was made in collaboration with team Leipert Motorsport, who invited Thomas to join the test day together with experienced Lamborghini racer, Kelvin Snoeks. The Lamborghini Huracan Super Trofeo car has 620 bhp and weighs just 1,270 kilograms.

Thomas was able to collect a few test kilometers on a dry track in the morning, and a lot of laps under wet conditions later on the day. He got used to the car very quickly, and impressed the team by matching and even outdoing the lap times of Kelvin.

Thomas: *"It was an incredible experience to drive in the Lamborghini Huracan, I will never forget this day. I learned a lot from session to session, and could adapt my driving style to the powerful car. The Lamborghini is very different to drive compared with the Porsche, which I am used to, but once I found the rhythm I felt very comfortable with the car. Today I gained a lot of valuable experience for my future racing career, and I hope to sit in this car very soon again."*

The test was made with a view for 2016, where Thomas is looking for new racing possibilities. One of them could be the Lamborghini Huracan Super Trofeo European Series, where around 40 Lamborghini cars compete in 12 exciting races spread over six race weekends. The races will take place in Italy, Great Britain, France, Belgium, Germany and Spain, and will drive together with the Blancpain GT weekends. The Lamborghini Huracan Super Trofeo series is a very competitive and highly ranked international championship, giving the opportunity to become a Lamborghini factory driver in the future.

In the coming weeks and months Krebs Racing are looking for new potential sponsors and investors, who could be interested in joining this journey, and make the next step possible in 2016.

Because of Thomas' strong performance at the test day in Spa, another test in Lamborghini is already under preparation.
